<u>Year 13</u>	Module 1	Module 2	Module 3		
<u>Law</u>					
Topic Theme and Intent	Students will complete the P2 tort law topics, including the theory. They will understand their rights in such situations as well as the relationship between law and morality, thus extending their higher order thinking and discursive skills. Students will explore contract law topics (P3) to gain knowledge of the law and their rights and responsibilities in this area.	Students will complete contract law and be aware of their rights when forming contracts. Further P3 ELS topics will provide an understanding of legal institutions and an awareness of the value of democracy. Investigating balancing conflicting interests and contract law theory will improve their higher order thinking and discursive skills.	We will revisit and revise areas of the syllabus to enable students to further embed the knowledge and the skills needed in readiness for the exams so that students are confident about how to approach the exam questions. Topics will be re taught if considered necessary. Focus will be on exam skills including accurately reading the question, knowing what to include, addressing the assessment objectives etc.

Analyse and critically evaluate legal issues/rules/concepts/theory by identifying different perspectives, and demonstrating the ability to consider alternative

Reading: Careful, accurate reading of exam questions to address the command words, identify key components and appreciate exactly what is being asked for. Reading of text book /journals, notes, mind-maps as well as the continued development of inference, deduction, identification of evidence and analytical reading skills.

Writing: in an appropriate style /length to address particular questions, following the command words, using the target language and adopting a balance between identification, description, explanation and analysis supported by legal authority, leading to the formulation of at least one, preferably more, solutions

Oracy: Students will form opinions (backed with legal authority) via discussion and test and develop them during paired and class discussions – thus addressing the need to devise solutions not just one solution, where possible.
